ELSEVIER

Dynamics of Atmospheres and Oceans 22 (1995) 257

dynamics of atmospheres and oceans

Contents of Volume 22

VOL. 22, NOS. 1–2 APRIL 1995

Research Papers

An analytical model of the balanced flow created by localized convective mass transfer in a rotating fluid
G. Shutts 1

On the attractors of an intermediate coupled ocean–atmosphere model
H.A. Dijkstra and J.D. Neelin 19

Eight definitions of the slow manifold: seiches, pseudoseiches and exponential smallness
J.P. Boyd 49

On the dispersion effects of atmospheric motion
S.K. Liu and S.D. Liu 77

Application of statistical techniques to the analysis and prediction of ENSO: Bayesian oscillation patterns as a prediction scheme
A. RuizdeElvira and M.J. OrtizBeviá 91

VOL. 22, NO. 3 JULY 1995

Research Papers

The Eady problem with linear horizontal shear
A. Barcilon and W. Blumen 115

The interaction of a pair of point potential vortices in uniform shear
D. Walsh and L.J. Pratt 135

Assessment of the influence of ENSO on annual global air temperatures
V.E. Privalsky and D.T. Jensen 161

VOL. 22, NO. 4 DECEMBER 1995

Research Papers

Dynamic effect of open latitude on wind-driven circulation in a zonal β-plane channel
L. Wang 179

Propagation of an envelope Rossby soliton over topography
B. Tan 199

Stuart vortices on a beta-plane
R. Mallier 213

Statistical fluctuations of an ocean surface inferred from shoes and ships
I. Lerche and F. Maubeuge 239
